TopcoatMIX

T 2A55 UNO HD Series mixing clear

The new Advance Series UNO HD Series of mixing clears deliver on performance every time. Now the same hardeners and thinners can be used for clear coats and topcoats. In addition to this there's only one mixing component instead of two. This leads to easier and faster processes, less stock and less waste. It features improved drying performance, a clear advantage over the competition. Advance your body shop – choose the Advance Series UNO HD Series mixing clears.

Advance Series - clear coat especially for ONYX HD basecoat. Improve's productivity with this easy-to-apply clear coat, that is perfect for a broad range of applications. Drying times can be influenced by the choice of hardener, thinner and application. Additive A 2A14 SpeedADD can reduce drying times. Polish after specified drying time and cooling.

FastTOP

C 2A44 Clear coat, fast drying

Advance Series - clear coat especially for ONYX HD basecoat. A fast-drying clear coat for increased productivity - whether it's for minor damage repair or complete car sides. Select hardener and reducer according to ambient temperature and size of the object to be painted. Drying times can be influenced by the choice of hardener, thinner and application. Additive A 2A14 SpeedADD can reduce drying times. Polish after specified drying time and cooling.

Advance Series - Speed additive for ADVANCE Series undercoats and clear coats. Enables reduced drying times and increases the chemical reactivity of the products it is used with, allowing shorter waiting times before sanding, polishing operations or reassembly can be started.
