

Colortronic 12/6 Perfect color matching!

Perfection made simple

A brand of **BASF**

Perfect results thanks to R-M's unique color database

Latest developments in IT and technology, but especially the color database of R-M makes the difference which is set up and managed since decades successfully: R-M enhance its measurement technology for its new portable COLORTRONIC 12/6 spectrophotometer. Twelve geometries ensure a perfect match rate for identifying the exact color. Once the color has been measured, the digital data can be transmitted via WIFI to the workstation for immediate processing. Finally, with R-M's improved COLORTRONIC 12/6, color adjustment is easy, making for precise matching.

Match colors perfectly and accurately

Quick - Reliable - Digital

- Thanks to the software but also the new hardware of the COLORTRONIC 12/6 make color matching exceptionally reliable. Twelve measurement values ensure that the results are highly accurate. Six photos from the integrated color camera also identify the effect in metallic / pearl finishes.
- The large display offer a vide review of the measurement target. Afterwards, the results can be transmitted to the workstation via WIFI.

With R-M's Color Explorer and Shop Master programs, the measurement data recorded by the COLORTRONIC 12/6 are then digitally compared with the color database and the best match is determined. Newly invented algorithms help adjust even closer the color to the target.

In addition, the latest manufacturers' colors can be searched for in the Color Explorer database worldwide.

The service package ensures that damaged devices can be replaced as quickly as possible.

R-M: Perfection made simple

The straightforward operation of R-M's COLORTRONIC 12/6 spectrophotometer makes it an indispensable aid in every bodyshop and speeds up work flows. With its innovative technical developments, the R-M brand endeavors to ensure that its customers have cutting-edge technology for their work.
