

TECHNICAL DATA SHEET

JET WET COAT

FEATURE:

JET WET COAT is a hydrophobic spray coating that can be easily applied after washing the car, this revolutionary formula takes only minutes to apply and leaves paint shiny and able to repel dirt and water for weeks. Perfect for increasing gloss and longevity on vehicle previously treated with an SiO₂ coating and for those without a coating at all, the self-cleaning effect will reduce the number of routine washes necessary! Suitable to work on paintwork, wheels, glass, vinyl and paint protection film.

DIRECTION:

Dilute before using:

- 1: Wash your car carefully.
2. Dilute in a snow foam cannon with a dilution for 1:10-1:15.
3. Simply spray the diluted Wet Coat on whole car and immediately rinse it off.
4. Now you will get a glossy and super-hydrophobic layer of protection brilliant for several months.

PRECAUTIONS:

Keep Out of reach of children

Use Wet Coat only on a wet surface and cool panel.

Never use this product in a direct sunlight.

If you're about to use the product in a warm or hot climate, work in sections.

TIOS: Rinse Wet Coat immediately.

Don't wait for the product to dwell or react-the reaction happens while you rinse it.

Don't spread it with mitts or towels, this is not necessary.
